

## **Blaise 5 improvements for large CAPI surveys (Peter Stegehius, Siu Wan, Naxin Zheng)**

For some of the largest and most complicated Blaise CAPI surveys, changing from Blaise 4.8 to Blaise 5 is a long process. From a programming perspective, it includes ensuring that specific features can be made to work, but also that overall performance is satisfactory. After all, Blaise 4.8 may be limited in what it can do compared to Blaise 5, but it is pretty fast. This paper delves into some of the testing we did for performance issues, and how Blaise 5.14 and now 5.15 address those issues.
